(Step) AFTER - AppHooks.
ApplicationHooks.tearDown(io.cucumber.
java.Scenario)

(S) Form Submission with Invalid Data

(F) User Details Form and Quote Results Validation

The screenshot displays the ActiveQuote website's user details form. The form is titled "Quote for" with a dropdown menu. The navigation bar includes links for "Health Insurance", "Income protection", "Life insurance", "Careers", "Meet the team", and "News". The form contains several input fields and validation messages:

- Email Address:** A red error message "Please enter a valid email address." is displayed above the email input field.
- Phone Number:** The label "Your phone number:" is followed by an empty input field. A red error message "Please provide your phone number" is displayed below the field.
- Postcode:** The label "What is your postcode?" is followed by an input field containing "CF10 4DE". A blue tooltip box is visible next to the field, stating "What is your postcode? Your postcode can be used as a factor by some insurers in the pricing of your income protection quote."
- Terms and Conditions:** A checkbox labeled "I can confirm that I have read, and accepted the Terms and conditions" is present. Below it, a red error message states "Please confirm the acceptance of our terms and conditions before continuing."
- Email Preference:** A section titled "I'm happy to receive occasional emails from ActiveQuote." includes radio buttons for "Yes" and "No". A red error message below states "Please select whether you would like to receive emails from Activequote."

On the right side of the form, there is a progress indicator with three steps: "1 Enter", "2 Compare", and "3 Buy". Below this, there is a call to action box with a photo of a customer service representative and the text "Call us free on 0800 862 0390".
